Chapter 1

Useful info for AAU Business School staff

This is a simple GitBook with a few useful links for AAU Business School staff - This site is only managed periodically, so links may not always be the most recent - please feel free to drop me a mail or teams message if you find something faulty.

1.1 Other pages that might be of interest

1.1.1 My research page

Rob's recent research page - anyone that is looking for code to process an SFC model for a report, or just wants to get some ideas about how different data can be visualised can browse the site and borrow and steal whatever is useful.

If you do use some of the code, and you're in academia, it would be pretty cool to get a reference (we are measured according to the relevance of our research) and every little bit helps.

The best option for me would be if you refer to my PhD:

Smith, R.A.B. (2020). Essays on macroeconomic interactions of sectoral balance sheets. Aalborg Universitetsforlag. Aalborg Universitet. Det Samfundsvidenskabelige Fakultet. Ph.D.-Serien

OR, you can get the bibtex reference here.

1.1.2 Supervision guide for AAU Economics students

The supervision guide for AAU students is a collection of project based tools. The idea is that students should be able to browse the table of contents, and

see if there is something that they need on the page. There is too much content for a complete read-through, so I would recommend picking and choosing based on your needs.

1.2 License

Attribution-Non Commercial 4.0 International (CC BY-NC 4.0)

This is a human-readable summary of (and not a substitute for) the license.

Disclaimer

You are free to:

Share — copy and redistribute the material in any medium or format

Adapt — remix, transform, and build upon the material

The licensor cannot revoke these freedoms as long as you follow the license terms.

Under the following terms:

Attribution — You must give appropriate credit, provide a link to the license, and indicate if changes were made. You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use.

NonCommercial — You may not use the material for commercial purposes.

No additional restrictions — You may not apply legal terms or technological measures that legally restrict others from doing anything the license permits.

Notices:

You do not have to comply with the license for elements of the material in the public domain or where your use is permitted by an applicable exception or limitation.

No warranties are given. The license may not give you all of the permissions necessary for your intended use. For example, other rights such as publicity, privacy, or moral rights may limit how you use the material.

Chapter 2

Introduction

Hi, my name is Robert Smith, and I am based at the Aalborg University Business School (2021), this page is just a collection of links and info that has been useful to me as an employee. I hope that the collection can make someone else's life a little easier.

Chapter 3

Some useful links for new staff members

3.1 Links to get your digital profile up and running

3.1.1 Useful staff info management sites

1. Explanation page - this site provides a brief description of the two links that are replicated below
 - a. PURE / VBN - for managing the research related content on your VBN profile. Activities, media presence, project participation and the connections that these all have to the various networks in AAU.
 - b. PDS - This page allows you to upload a new profile image, change your nickname, check your holidays and your core personal data. The research and teaching info on this page are, however, superceded by the info you enter on the PURE platform - So don't bother editing it here.
2. Plan2Learn - This is where you will find information on the courses available for staff development. For example there are first aid courses in both Danish and English that you could sign up for there.
3. Insight - Teaching hours system

3.2 Useful generic shortcuts

1. AAU University library

2. AAU Mail server
3. AAU Moodle dashboard page
4. AAU design guide, templates and logos - unfortunately only in Danish
5. AAU Business School presentation and design templates
6. AAU Business School homepage
7. List of printers and setup guides
8. The IT purchase catalogue

3.3 Links to university support systems

1. CALDISS - For training in data analytics software, access to amazing data and general digital guidance.
2. CLAUDIA - For assistance with Research data and IT hardware services.
3. AI for the people - For help implementing AI based technologies in your research or projects.

3.4 A supervision materials page

This is just a GitPage dump of communication and tools that have I have used in supervision. All of the content is generated by RMarkdown - as is this site - and all of the back end code is available in the Git repository (**main** branch) behind the page (**gh-pages** branch).
